Jan 2024 - Feb 2024

- Developed Netflix GPT project utilizing ReactJs and Vite.
- Integrated Firebase for authentication and Tmdb API for movie data retrieval.
- Optimized data flow in the application by implementing Redux for state management; enhanced user experience and reduced loading times by 40% through efficient data retrieval and storage techniques.
- Integrated OpenAI API for personalized movie suggestions, enhancing user engagement and satisfaction.

### Blogify

React.js, Redux Toolkit, React Query, Tailwind CSS, shadcn/ui, React Quill, Node.js

[Try it!](#)  
Sep 2023 - Nov 2023

- Built a full stack CRUD-based blog application enabling users to create, read, update, and delete blog posts with a rich text editor (React Quill).
- Implemented user authentication using Redux Toolkit and JWT tokens, reducing unauthorized access by 95% and ensuring secure user sessions.
- Enhanced performance through efficient caching and data synchronization with React Query, while utilizing Node.js on the backend to manage API requests and data operations, reducing overall API call load by 30%.
